*Diffusion Chromizing of Alloys* G. N. Dubinin, 1987      **Encyclopedia of Iron, Steel, and Their Alloys (Online Version)** Rafael Colás, George E. Totten, 2016-01-06 The first of many important works featured in CRC Press Metals and Alloys Encyclopedia Collection the Encyclopedia of Iron Steel and Their Alloys covers all the fundamental theoretical and application related aspects of the metallurgical science engineering and technology of iron steel and their alloys This Five Volume Set addresses topics such as extractive metallurgy powder metallurgy and processing physical metallurgy production engineering corrosion engineering thermal processing metalworking welding iron and steelmaking heat treating rolling casting hot and cold forming surface finishing and coating crystallography metallography computational metallurgy metal matrix composites intermetallics nano and micro structured metals and alloys nano and micro alloying effects special steels and mining A valuable reference for materials scientists and engineers chemists manufacturers miners researchers and students this must have encyclopedia Provides extensive coverage of properties and recommended practices Includes a wealth of helpful charts nomograms and figures Contains cross referencing for quick and easy search Each entry is written by a subject matter expert and reviewed by an international panel of renowned researchers from academia government and industry Also Available Online This Taylor E mail e reference taylorandfrancis com International Tel 44 0 20 7017 6062 E mail online sales tandf co uk      *Nickel, Cobalt, and Their Alloys* Joseph R. Davis, 2000-01-01 This book is a comprehensive guide to the compositions properties processing performance and applications of nickel cobalt and their alloys It includes all of the essential information contained in the ASM Handbook series as well as new or updated coverage in many areas in the nickel cobalt and related industries      **Aerospace Materials Handbook** Sam Zhang, Dongliang Zhao, 2016-04-19 Whether an airplane or a space shuttle a flying machine requires advanced materials to provide a strong lightweight body and a powerful engine that functions at high temperature The Aerospace Materials Handbook examines these materials covering traditional superalloys as well as more recently developed light alloys Capturing state of the art developments in materials research for aeronautical and aerospace applications this book provides a timely reference for both newcomers and veteran researchers in the field The chapters address developments in bulk materials coatings traditional materials and new materials Beginning with an overview of superalloys including nickel nickel iron and cobalt based superalloys the text covers machining laser cladding and alloying corrosion performance high temperature oxidation thermal spraying and nanostructured coatings It also includes four categories of composites used in aerospace metal matrix polymer carbon nanotube reinforced polymer and self healing composites The text describes preparation processing and fatigue of lightweight magnesium alloys as well as an exciting new class of materials aerogels This book brings readers to the cutting edge of research in materials for aerospace and aeronautics It provides an entry point into this field and presents details to stimulate future research This unique up to date resource offers knowledge to enable practitioners to develop faster more efficient and more reliable air and spacecraft

**Superalloys** Matthew J. Donachie, Stephen J. Donachie, 2002 This book covers virtually all technical aspects related to the selection processing use and analysis of superalloys The text of this new second edition has been completely revised and expanded with many new figures and tables added In developing this new edition the focus has been on providing comprehensive and practical coverage of superalloys technology Some highlights include the most complete and up to date presentation available on alloy melting Coverage of alloy selection provides many tips and guidelines that the reader can use in identifying an appropriate alloy for a specific application The relation of properties and microstructure is covered in more detail than in previous books     Technical Data Digest ,1949     **Diffusion Chromising and Nickelising of Steel by Chemical Vapour Deposition** Kauko Jyrkäs,1990     **High Temperature Alloys for Gas Turbines and Other Applications, 1986** W. Betz,1986     *Confidential Documents* United States. Army Air Forces,1949-07     **The Physics of Metals and Metallography** ,1985     **Advances in Surface Treatments** A. Niku-Lari,2013-10-22 Advances in Surface Treatments provides information on technologies applications and effects of surface treatment processes on different materials The text is composed of papers that are presented at the AST World Conference Advances in Surface Treatments and Surface Finishing held in Paris in December 1986 The book is divided into six parts each of which discusses a different topic in the field of surface treatment These topics include thermal and thermochemical surface treatments mechanical surface treatments and their effects quality control of surface treated materials surface finishing surface coating laser surface of hardening materials and the relationship of surface treatment with the environment Topics such as metallic coatings and special surface treatments are also covered in the book The text is recommended for engineers who are not yet familiar with surface treatments as well as those who wish to contribute to the research in this field     *Environmental Degradation of Metals* U.K. Chatterjee,S.K. Bose,S.K. Roy,2001-03-02 This highly practical reference presents for the first time in a single volume all types of environmental degradation a metallic compound may undergo during its processing storage and service Clarifying general and localized corrosion effects Environmental Degradation of Metals describes the effects of atmospheric exposure high temperature gases soil water weak and strong chemicals liquid metals and nuclear radiation It determines whether corrosion can occur under a given set of conditions shows how improvements in component design can reduce corrosion and details the high and low temperature effects of oxidizing agents The book also investigates the instantaneous and delayed failure of solid metal in contact with liquid metal highlights the influence of hydrogen on metal and profiles radiation effects on metal     Nuclear Science Abstracts ,1976     **Corrosion and Materials in the Oil and Gas Industries** Reza Javaherdashti,Chikezie Nwaoha, Henry Tan,2016-04-19 The advancement of methods and technologies in the oil and gas industries calls for new insight into the corrosion problems these industries face daily With the application of more precise instruments and laboratory techniques as well as the development of new scientific paradigms corrosion professionals are also witnessing a new era in the way d     **NASA Technical Note** ,1972     *Use of Services for Family*

*Planning and Infertility, United States, 1982* Gerry E. Hendershot, Marjorie C. Horn, William D. Mosher, 1988 The 1982 statistics on the use of family planning and infertility services presented in this report are preliminary results from Cycle III of the National Survey of Family Growth NSFG conducted by the National Center for Health Statistics Data were collected through personal interviews with a multistage area probability sample of 7969 women aged 15-44 A detailed series of questions was asked to obtain relatively complete estimates of the extent and type of family planning services received Statistics on family planning services are limited to women who were able to conceive 3 years before the interview date Overall 79% of currently married nonsterile women reported using some type of family planning service during the previous 3 years There were no statistically significant differences between white 79% black 75% or Hispanic 77% wives or between the 2 income groups The 1982 survey questions were more comprehensive than those of earlier cycles of the survey The annual rate of visits for family planning services in 1982 was 1077 visits 1000 women Teenagers had the highest annual visit rate 1581 1000 of any age group for all sources of family planning services combined Visit rates declined sharply with age from 1447 at ages 15-24 to 479 at ages 35-44 Similar declines with age also were found in the visit rates for white and black women separately Nevertheless the annual visit rate for black women 1334 1000 was significantly higher than that for white women 1033 The highest overall visit rate was for black women 15-19 years of age 1867 1000 Nearly 2/3 of all family planning visits were to private medical sources Teenagers of all races had higher family planning service visit rates to clinics than to private medical sources as did black women age 15-24 White women age 20 and older had higher visit rates to private medical services than to clinics Never married women had higher visit rates to clinics than currently or formerly married women Data were also collected in 1982 on use of medical services for infertility by women who had difficulty in conceiving or carrying a pregnancy to term About 1 million ever married women had 1 or more infertility visits in the 12 months before the interview During the 3 years before interview about 1.9 million women had infertility visits For all ever married women as well as for white and black women separately infertility services were more likely to be secured from private medical sources than from clinics The survey design reliability of the estimates and the terms used are explained in the technical notes
