Nowadays in cyberspace there is a burst of information to which everyone has access However apart from the advantages the internet offers it also hides numerous dangers for both people and nations Cyberspace has a dark side including terrorism bullying and other types of violence Cyberwarfare is a kind of virtual war that causes the same destruction that a physical war would also do A hybrid threat is an umbrella term encompassing a wide variety of existing adverse circumstances and actions such as terrorism migration piracy corruption ethnic conflict etc and is not exclusively a tool of asymmetric or non state actors but can be applied by state and non state actors alike Cyberconflict and cyberwar serve as examples of the use of new technologies within the scope of hybrid threats Cyberwar basically refers to a sustained computer based cyberattack by a state against the information technology IT infrastructure of a target state On the other hand cybersecurity is a major
