*Labour Law and Sustainable Development* Valentina Cagnin, 2020-06-05 Labour Law and Sustainable Development is a detailed reconstruction of the regulatory framework and jurisprudential findings of sustainable development at the international European and national level The global crisis of the past decade has underlined the social unsustainability of the ultra liberalistic theories through which the labour law deregulation represents the precondition for social and economic development coherent with the globalization imperatives It is no exaggeration to assert that the existing foundations of labour law have been irreversibly compromised It is essential to find a way out of the crisis at the same time defining the founding values of new sustainable labour law In linking labour law with the sustainability paradigm this provocative book promises to widen the scope and terms of the reconciliation of interests taking into account the multiplicity of the stakeholders interested in economic social and environmental issues and in particular to practise an approach that achieves intergenerational equity What's in this book In an unprecedented comparative study including case law of the network of principles agreements practices and norms concerning sustainable development and its different economic and social implications the author examines such facets as the following sustaining solidarity and equality of opportunity in current and emerging work situations enhancing individual autonomy in the current world of subordinate but independent labour

reconciling personal needs flexible organization of companies and reduction of external and internal costs to companies collective action for the regulation of labour relations allowing for the exercise of individual autonomy involving entire populations that have been so far excluded in the world scene developing a sustainable pension system to promote intergenerational solidarity implementing flexicurity policies positively social clauses of international trade treaties undoing the profound contradiction of gender and wage inequalities and promoting corporate social responsibility The objective of this book is to provide the reader with a reasoning basis to assess whether the choice to elect sustainable development as a new paradigm of reference for labour law is feasible and if in particular this choice can be useful in order to define the founding values of a new sustainable labour law How this will help you Using an interdisciplinary approach the author emphasizes the need to consider the various dimensions of sustainability together not only the original environmental but also the economic and social dimensions This book offers a real strategic leap for both legislators and social actors in particular leading the way to avoiding a fracture of the generational pact that has held together modern societies Although the book presents a profound academic contribution to the analysis of labour law realities and trends it will also be welcomed by corporate lawyers judges human rights experts trade unionists business managers entrepreneurs and consultants interested in the issues of labour sustainable development and social rights

*Sports Law in Italy* Michele Colucci, Giuseppe Candela, Salvatore

Civale, Alessandro Coni, 2018-05-15 Derived from the renowned multi volume International Encyclopaedia of Laws this practical analysis of sports law in Italy deals with the regulation of sports activity by both public authorities and private sports organizations The growing internationalization of sports inevitably increases the weight of global regulation yet each country maintains its own distinct regime of sports law and its own national and local sports organizations Sports law at a national or organizational level thus gains a growing relevance in comparative law The book describes and discusses both state created rules and autonomous self regulation regarding the variety of economic social commercial cultural and political aspects of sports activities Self regulation manifests itself in the form of by laws and encompasses organizational provisions disciplinary rules and rules of play However the trend towards more professionalism in sports and the growing economic social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities This form of regulation appears in a variety of legal areas including criminal law labour law commercial law tax law competition law and tort law and may vary following a particular type or sector of sport It is in this dual and overlapping context that such much publicized aspects as doping sponsoring and media and responsibility for injuries are legally measured This monograph fills a gap in the legal literature by giving academics practitioners sports organizations and policy makers access to sports law at this specific level Lawyers representing parties with interests in Italy will welcome this very useful guide and academics and researchers will appreciate its value in the study of comparative sports law

*Die Moderne Demokratie und ihr Recht: Staats- und Verfassungsrecht* Karl Dietrich Bracher, 1966

*Enterprise and Social Rights* Adalberto Perulli, Tiziano Treu, 2017-06-15 Globalization has led to growing labour fragmentation and widening of gaps in social protection. Although the enterprise is increasingly expected to be socially responsible in actuality extreme worker inequalities and social dumping have become ubiquitous worldwide. This volume the first to focus attention on the theory of the firm as it reveals itself in today's world from a multidisciplinary perspective underscores the necessity to rebuild a new scientifically controlled paradigm that acknowledges and regulates the dimension of power in the functioning of the organization. In their contributed essays nineteen renowned scholars in labour law and industrial relations rethink the firm its conception its value and its regulation analysing such aspects as the following labour management relations issues that arise when companies go global but workers remain local the firm as a social construction the continuing necessity for collective bargaining concealment of the employment relationship under the guise of self employment concealment of the real employer behind figureheads and shell companies social welfare effects of outsourcing the company's interaction with the network of suppliers and with local education processes determining who actually carries responsibility towards workers overcoming companies drive to enter the global market in response to national regulation realizing the notion of duty of care mechanisms of participation of workers in the management of the enterprise and the persistent limitations that women face in the workplace even when worker participation is advocated. With attention to innovative developments in Germany Italy Japan and other countries analyses include case studies of specific companies as well as case law in particular the European Court of Justice's jurisprudence in matters of collective dismissals seconded workers and public contracts. In their head on tackling of the fragmentation and blurring of social responsibility in enterprise organization these important essays propose a view of the enterprise as a factor in a new constitutionalisation of labour that shifts employment protection from single legal entities to the network's economic activity thus realigning the legal boundaries of the enterprise with its economic reality. As a compelling investigation of how a satisfactory implementation of labour standards in the fragmented enterprise can be guaranteed this book will be studied by entrepreneurs managers consultants corporate lawyers judges human rights experts and trade unionists and will be welcomed by academics and researchers in industrial relations and labour law.
