berleben des Buddhismus auf dem indischen Subkontinent Wiederbelebung *A History of Uyghur Buddhism* Johan Elverskog, 2024-06-18 Today most Uyghurs are Muslims For centuries however Uyghurs were Buddhists By around 1000 CE they like many of their neighbors had decisively turned toward the Dharma and a golden age of Uyghur Buddhism flourished under the Mongol empire Dwelling along the Silk Road in what is now northwestern China they stood at the center of Buddhist Eurasia linking far flung regions and traditions But as Muslim power grew Uyghur Buddhists converted to Islam rewriting their past and erasing their Buddhist history This book presents the first comprehensive history of Buddhism among the Uyghurs from the ninth to the seventeenth century Johan Elverskog traces how the Uyghurs forged their distinctive tradition considering a variety of social political cultural and religious contexts He argues that the religious history of the Uyghurs challenges conventional narratives of the meeting of Buddhism and Islam showing that conversion took place gradually and was driven by factors such as geopolitics climate change and technological innovation Elverskog also provides a nuanced understanding of lived Buddhism focusing on ritual practices and materiality as well as the religion's entanglements with economics politics and violence A groundbreaking history of Uyghur Buddhism this book makes a compelling case for the importance of the Uyghurs in shaping the course of both Buddhist and Asian history **The Oxford Handbook of American Buddhism** Ann Gleig, Scott A. Mitchell, 2024 The Oxford Handbook of American Buddhism offers the most comprehensive and up to date scholarship available on Buddhism in America It charts the history and diversity of Buddhist communities including traditions and communities that have been previously neglected and looks at the ways in which Buddhist practices such as mindfulness meditation have been adopted in non Buddhist settings *Introducing Buddhism* Venerable Dr. Balangoda Ananda Maitreya Mahanayaka Thera Abhidhaja Maharatthaguru Aggamaha Pandita DLitt D Litt, Jayasili, 2007 *Buddhist and Islamic Orders in Southern Asia* R. Michael Feener, Anne M. Blackburn, 2018-01-31 Over the last few decades historians and other scholars have succeeded in identifying diverse patterns of connection linking religious communities across Asia and beyond Yet despite the fruits of this specialist research scholars in the subfields of Islamic and Buddhist studies have rarely engaged with each other to share investigative approaches and methods of interpretation This volume was conceived to open up new spaces of creative interaction between scholars in both fields that will increase our understanding of the circulation and localization of religious texts institutional models ritual practices and literary specialists The book's approach is to scrutinize one major dimension of the history of religion in Southern Asia religious orders Orders here referring to Sufi *ar qas* and Buddhist monastic and other ritual lineages established means by which far flung local communities could come to be recognized and engaged as part of a broader world

of co religionists while presenting their particular religious traditions and their human representatives as attractive and authoritative to potential new communities of devotees Contributors to the volume direct their attention toward analogous developments mutually illuminating for both fields of study Some explain how certain orders took shape in Southern Asia over the course of the nineteenth century contextualizing these institutional developments in relation to local and transregional political formations shifting literary and ritual preferences and trade connections Others show how the circulation of people ideas texts objects and practices across Southern Asia a region in which both Buddhism and Islam have a long and substantial presence brought diverse currents of internal reform and notions of ritual and lineage purity to the region All chapters draw readers attention to the fact that networked persons were not always strongly institutionalized and often moved through Southern Asia and developed local bases without the oversight of complex corporate organizations Buddhist and Islamic Orders in Southern Asia brings cutting edge research to bear on conversations about how orders have functioned within these two traditions to expand and sustain transregional religious networks It will help to develop a better understanding of the complex roles played by religious networks in the history of Southern Asia

Buddhism and the Coronavirus Jeaneane Fowler, 2021-01-07 This book examines the early teachings of Buddhism associated with the life of the Buddha Siddhatta Gotama In these teachings the Buddha put forward his famous Four Noble Truths concerning the nature of suffering its causes the Truth that it can be overcome and a pathway to end suffering The suffering experienced in the contemporary coronavirus pandemic may seem to be very distant from the Buddhas message delivered over two thousand years ago but the teaching of the Four Noble Truths is as relevant today as it was all that time ago So this book melds the two occasionally with discrete treatment of past and present but ever cognizant of the ways in which the teachings of the past inform the present crisis To understand coronaviruses the book examines the

nature of viruses their origins causes and the ways in which they are both friends and enemies of humankind Importantly and crucially the book investigates how far humanity itself is the cause of its own suffering in the pandemics that arise no less in the coronaviruses that have emerged in the twenty first century Chapters include The Buddha Viruses Friends and Enemies The Noble Truth of Suffering The Second Noble Truth of the Cause of Suffering The Third Noble Truth of the Cessation of Suffering The Fourth Noble Truth The Noble Eightfold Path The Noble Eightfold Path Mindfulness and Concentration The Brahma vihara Love Compassion Sympathetic Joy Equanimity *Iran and Persianate Culture in the Indian Ocean World* Andrew Peacock,2025-02-06 The first interdisciplinary study of the history of contact between Iranians and the peoples and polities of the Indian Ocean Most of the historiography of the Iranian world focuses on interactions and migrations between Iran Central Asia and India Nonetheless this Iranian world was also closely connected to the maritime one of the Indian Ocean While scholarship has drawn attention to diverse elements of these latter interactions ranging from the claims to Shirazi descent of East African communities to Persian elements in Malay literature and Iranian communities of merchants in China such studies have remained largely isolated from one another The consensus of historiography on the Indian Ocean presents it as an Arabic cosmopolis or in earlier times a Sanskrit one The aim of this book is thus to bring together scholars working on disparate aspects of Persianate interactions with the Indian Ocean world from antiquity to modern times to provide a more rounded picture of both the history of the Persianate world broadly conceived and that of the Indian Ocean The book brings together a collection of internationally renowned scholars from a variety of disciplines including archaeology history literature linguistics art history and covers interactions in Iran s political and commercial relations with the Indian Ocean world in history Persian speaking communities in the Indian Ocean world Persian ate elements in Indian Ocean languages and literatures Persian texts dealing with the Indian Ocean and connections in material culture **Introducing Buddhism , Zen Buddhism and Environmental Ethics** Simon P. James,2017-03-02 Zen Buddhism and Environmental Ethics explores the implications of Zen Buddhist teachings and practices for our moral relations with the natural world At once an accessible introduction to Zen and an important contribution to the debate concerning the environmental implications of the tradition this book will appeal both to readers unfamiliar with East Asian thought and to those well versed in the field In elucidating the philosophical implications of Zen the author draws upon both Eastern and Western philosophy situating the Zen understanding of nature within the Buddhist tradition as well as relating it to the ideas of key Western philosophers such as Aristotle Kant and Heidegger These philosophical reflections on Zen are used to shed light on some prominent debates in contemporary environmental ethics concerning such issues as the intrinsic value of nature *Evolution Is Wrong* Erich von Däniken,2022-12-01 A Fascinating Exploration on Why the Darwinists Theory No Longer Explains Everything There was once a set of ideas called the theory of evolution conceived by clever people and confirmed by countless scientists Then people discovered the electron microscope This made it possible to make the molecules within the

cell visible and suddenly questions about evolution arose that were not possible before Which force actually bundles the atoms in the right order What moves the molecular chains into the correct position How did the first living unit within the cell actually come about How does inheritance work how does information pass on to the next generation Did humans descend only and exclusively from primates as Charles Darwin and countless other great minds assumed or did additional engines intervene in evolution Today it is clear countless questions can no longer be answered with the previous theory of evolution There is a form of life called Blob *Physarum polycephalum* The thing has neither eyes nor ears neither a mouth nor a nose or even a brain Nevertheless it takes in food overcomes obstacles by the shortest route and exchanges information with other blobs The blob contradicts any evolutionary thought that one develops from the other Or the gastric brooding frogs *Rheobatrachus* found in Australia They hatch their young in the stomach Impossible in a slow evolutionary process Everywhere there are characteristics of animals that do not want to fit into the theory of evolution anywhere And man Are we really the most adapted life form on this planet Today more and more scientists who contradict the previous theory of evolution speak out The theory fits the changes within the species but it can no longer be reconciled with the inner workings of the cell Some other influence that has so far escaped us is affecting evolution It is called Intelligent Design Intelligent planning is suspected behind this Anyone or anything a spirit of the universe Aliens could be behind this planning Erich von D niken uses countless examples to demonstrate the impossibility of the previous evolutionary idea He quotes scientists who argue against the previous teaching but also those who defend it Unfortunately established science still refuses to look at discrepancies and holes in the theory of evolution even though it is quite obvious that there is more going on with regard to the development of all species as well as human culture than could be explained by the theory of evolution alone

Contemporary Buddhist Ethics Damien Keown, 2013-01-11 This innovative volume brings together the views of leading scholars on a range of controversial subjects including human rights animal rights ecology abortion euthanasia and contemporary business practice *Calling in Today's World* Cahalan & Schuurman, 2016 The concept of vocation or calling is a distinctively Christian concern grounded in the long held belief that we find our meaning purpose and fulfillment in God But what about religions other than Christianity What does it mean for someone from another faith tradition to understand calling or vocation In this book contributors with expertise in Catholic and Protestant Christianity Judaism Islam Hinduism Buddhism Confucianism and Daoism and secular humanism explore the idea of calling from these eight faith perspectives from back of book **The Value Orientations of Buddhist and Christian Entrepreneurs** Gábor Kovács, 2020-07-30 This book is a comparative analysis of the value orientations of Buddhist and Christian entrepreneurs and how these values impact business The chapters review and analyze the concepts of Buddhist economics and the social teaching of the Roman Catholic Church The value orientations of Buddhist and Christian entrepreneurs are described by irreducible core values that correspond to the ontological conception the procedural dimension and the other directedness of a spiritual value

commitment in business The book includes the reflections of Buddhist and Christian entrepreneurs about business spirituality profit the temporal perspectives of business and stakeholder management The cases testify that a spiritual value orientation can contribute to creating genuine ethical commitment The findings and the examples can encourage business scholars and practitioners to stop considering ethics as an instrument in the service of profit and serve as inspiration for integrating spirituality into business in a profound way This book will be of interest to scholars studying business ethics workplace spirituality and faith at work *Studying Christian Spirituality* David B. Perrin, 2007-08-07 This book provides a

new introduction to the study of Christian spirituality exploring it through the human sciences and ranging from philosophy and hermeneutics to psychology history sociology and anthropology Systematic and progressive it introduces the key approaches and shows how they relate to the understanding study and practice of spirituality Covering a vast amount of ground from traditional themes such as images of God spiritual direction and pilgrimage to more contemporary issues such as place and space cyberspace and postcolonialism the author takes an ecumenical inclusive stance allowing the book to be used in a wide variety of courses and across denominations **Philosophy East / West** Oren Ergas, Sharon

Todd, 2016-01-26 *Philosophy East West* showcases new scholarship in the philosophy of education and contemplative studies paying particular attention to the intersection of mindfulness evidence based science and wisdom traditions Moves beyond simplistic explanations of Eastern and Western to explore the complexity and diversity of various wisdom traditions Investigates the effect of mindfulness based curricular interventions on current educational theory and practice Uses insights from important Western philosophers including Heidegger Levinas and Foucault to situate contemplative practice within contemporary educational theory Emphasizes the importance of transcultural and intercultural approaches in the philosophy of education **In Praise of Mixed Religion** William H. Harrison, 2014-05-01 When asked What religion do you follow the

typical answer is to name a specific group or to respond None An increasing number of people however are intentionally combining elements from various religious heritages demonstrating that religions do not have firm boundaries nor are they purely distinct In Praise of Mixed Religion discusses the concept of syncretism the term for the mixing of religious perspectives The religious studies discipline has traditionally distinguished between two responses to syncretism a subjective view which treats syncretism as morally reprehensible and an objective view which treats it as a morally neutral phenomenon William Harrison adopts a third perspective the advocacy view which claims that mixing religions is a good and necessary process He cites countless examples such as Islam's transformative encounter with Greek thought from both history and recent years to show how religious traditions have gained theological and practical wisdom by borrowing key ideas beliefs and practices from outside their own movements By encouraging syncretism In Praise of Mixed Religion contests the hard boundaries between religious worldviews and presents a dramatic alternative for thinking and talking about religion
