An Anthropologist On Mars Seven Paradoxical Tales:

An Anthropologist on Mars Oliver Sacks, 2011-06-16 As with his previous bestseller *The Man Who Mistook His Wife for a Hat* in *An Anthropologist on Mars* Oliver Sacks uses case studies to illustrate the myriad ways in which neurological conditions can affect our sense of self our experience of the world and how we relate to those around us Writing with his trademark blend of scientific rigour and human compassion he describes patients such as the colour blind painter or the surgeon with compulsive tics that disappear in the operating theatre patients for whom disorientation and alienation but also adaptation are inescapable facts of life An inexhaustible tourist at the farther reaches of the mind Sacks presents in sparse unsentimental prose the stories of seven of his patients The result is as rich vivid and compelling as any collection of short fictional stories *Independent on Sunday*

An Anthropologist on Mars Colin Thubron, 1981 *An Anthropologist on Mars* Oliver W. Sacks, 1997-04-01

Here are seven detailed and fascinating portraits of neurological patients including a surgeon consumed by the compulsive tics of Tourette's syndrome unless he is operating an artist who loses all sense of color in a car accident but finds a new sensibility and creative power in black and white and an autistic professor who cannot decipher the simplest social exchange between humans but has built a career out of her intuitive understanding of animal behavior Sacks combines the well honed mind of an academician with the verve of a true storyteller and manages to produce a book at once accessible and challenging The capacity to observe the patient as a different form of human being instead of as just an interesting case is a true insight into what Medicine should be furthermore as the author insistently teaches neurological diseases differ from other ailments in that they become a true portion of the persona and in a sense they belong to the patient whereas most people consider disease to be something that happens to them an outside influence not to be confused with the true Self It is a truly accessible and moving book and teaches us all something about the diversity and depths of the human kind

An Anthropologist on Mars Oliver W. Sacks, 1996 Neurological patients Oliver Sacks once wrote are travellers to unimaginable lands *An anthropologist on Mars* offers portraits of seven such travellers including a British Columbia surgeon consumed by the compulsive tics of Tourette's syndrome unless he is operating an artist who loses all sense of colour in a car accident but finds a new sensibility and creative power in black and white and an autistic professor who cannot decipher the simplest social exchange between humans but has built a career out of her intuitive understanding of animal behaviour
