Advances in Future Computer and Control Systems David Jin, Sally Lin, 2012-04-13 FCCS2012 is an integrated conference

concentrating its focus on Future Computer and Control Systems Advances in Future Computer and Control Systems presents the proceedings of the 2012 International Conference on Future Computer and Control Systems FCCS2012 held April 21-22, 2012 in Changsha, China, including recent research results on Future Computer and Control Systems of researchers from all around the world **Real-Time Embedded Systems** Christos Koulamas, Mihai T.

Lazarescu, 2019-01-10 This book is a printed edition of the Special Issue Real Time Embedded Systems that was published in Electronics *Real-Time Data Analytics for Large Scale Sensor Data* Himansu Das, Nilanjan Dey, Valentina Emilia

Balas, 2019-08-31 Real Time Data Analytics for Large Scale Sensor Data covers the theory and applications of hardware platforms and architectures, the development of software methods, techniques and tools, applications, governance and adoption strategies for the use of massive sensor data in real time data analytics. It presents the leading edge research in the field and identifies future challenges in this fledgling research area. The book captures the essence of real time IoT based solutions that require a multidisciplinary approach for catering to on the fly processing, including methods for high performance stream processing, adaptively streaming, adjustment, uncertainty handling, latency handling and more. Examines IoT applications, the design of real time intelligent systems and how to manage the rapid growth of the large volume of sensor data. Discusses intelligent management systems for applications such as healthcare, robotics and environment modeling. Provides a focused approach towards the design and implementation of real time intelligent systems for the management of sensor data in large scale environments **Internet of Healthcare Things** Kavita Sharma, Yogita Gigras, Vishnu Sharma, D. Jude

Hemanth, Ramesh Chandra Poonia, 2022-01-28 INTERNET OF HEALTHCARE THINGS The book addresses privacy and security issues, providing solutions through authentication and authorization mechanisms, blockchain, fog computing, machine learning algorithms so that machine learning enabled IoT devices can deliver information concealed in data for fast computerized responses and enhanced decision making. The main objective of this book is to motivate healthcare providers to use telemedicine facilities for monitoring patients in urban and rural areas and gather clinical data for further research. To this end, it provides an overview of the Internet of Healthcare Things (IoHT) and discusses one of the major threats posed by it, which is the data security and data privacy of health records. Another major threat is the combination of numerous devices and protocols, precision time data overloading, etc. In the IoHT, multiple devices are connected and communicate through certain protocols. Therefore, the application of emerging technologies to mitigate these threats and provide secure data communication over the network is discussed. This book also discusses the integration of machine learning with the IoHT for analyzing huge amounts of data for predicting diseases more accurately. Case studies are also given to verify the concepts presented in the book. Audience: Researchers and industry engineers in computer science, artificial intelligence, healthcare sector, IT professionals, network administrators, cybersecurity experts **Trustworthy Execution on Mobile Devices** Amit

Vasudevan, Jonathan M. McCune, James Newsome, 2013-08-13 This brief considers the various stakeholders in today's mobile

device ecosystem and analyzes why widely deployed hardware security primitives on mobile device platforms are inaccessible to application developers and end users Existing proposals are also evaluated for leveraging such primitives and proves that they can indeed strengthen the security properties available to applications and users without reducing the properties currently enjoyed by OEMs and network carriers Finally this brief makes recommendations for future research that may yield practical and deployable results
