[The JCT 2011 Building Sub-contracts](#) Peter Barnes, Matthew Davies, 2015-09-10 The majority of construction work is carried out by subcontractors As building projects become more complex subcontractors need to understand the implications of the agreements they sign The JCT 2011 Building

Subcontracts has been written to help the busy subcontractor deal effectively with the range of JCT 2011 subcontracts they will encounter. It covers the most commonly used 2011 subcontracts looking at the key contract conditions, the rights and obligations of the parties and how risk is allocated. A key element of the book is the discussion of the main practical problems that arise. Accessible and practical, this book will ensure building and construction subcontractors understand these contracts and have an easy-to-consult reference if any questions arise. It will also be of interest to main contractors, architects, contract administrators, project managers, quantity surveyors, contracts consultants and construction lawyers.

The JCT 05 Standard Building Sub-Contract Peter Barnes, 2008-04-15. Although the majority of construction work these days is carried out by subcontractors, there are surprisingly few books dealing with building subcontracts and the related law. This book provides a much welcomed guide to the new 2005 JCT Standard Building Sub Contract SBCSub and SBCSub D, which is likely to be the regular sub contract form used by contractors when letting works under the radically revised 2005 JCT Standard Building Contract. Peter Barnes, who has over 30 years' experience of contractor-subcontractor relationships, provides a clause-by-clause commentary on the sub contract, highlighting practical issues and considering relevant case law. The book will be of interest not only to sub contractors and main contractors but also to other construction professionals and lawyers who need an understanding of the contractual relationship and allocation of risk between contractors and sub contractors. The Author Peter Barnes MSc Construction Law and Arbitration DipICarb FCIQB FCIARB MRICS is a Chartered Arbitrator, a registered adjudicator and a CIARB trained mediator. He has been actively involved in the construction industry for almost 30 years and has a wide experience of many types of construction work, including building both new build and refurbishment, civil engineering and mechanical and electrical installations. He spent many years working for main contractors undertaking both surveying and management roles, and during that time he has administered and settled a multitude of sub contract accounts on a variety of different contracts. His experience with sub contracts covers both simple and complex contracts and has involved detailed examination of contractual entitlements. His practical background has led to an in-depth understanding of the allocation of risks in contractor-subcontractor relationships. Since becoming a consultant, Peter Barnes has represented many parties in both adjudications and arbitrations, has acted as an expert witness in respect of both liability and quantum, and has been appointed as adjudicator by both the Chartered Institute of Arbitrators and the Construction Industry Council. His wide experience base has led to him being appointed to the committees of the Chartered Institute of Building Eastern Branch, the Chartered Institute of Arbitrators East Anglia Branch and the Institution of Civil Engineering Surveyors Anglia and Central Branch.
