Intelligent Freight Transportation Petros A. Ioannou,2008-03-24 Increasing capacity at ports and goods movement in the supply chain in general while also satisfying environmental economic political labor union and other constraints is arguably the greatest challenge of modern transportation With space at a premium and costs through the roof it is increasingly obvious that the traditional solutions are

Energy Efficiency in Shipping for Environmental Sustainability Ashok Menon,2024-10-29 This book examines the environmental impact of emissions from ships setting out the mandatory regulations of MARPOL 73 78 and the Shipboard Energy Efficiency Management Plan as well as new International Maritime Organization regulations such as MEPC 80 Chapters provide an in depth understanding of how

ship staff can increase energy efficiency by reducing fuel consumption and using innovative technologies Comprehensive coverage of energy audit methodology is offered to ensure compliance with energy efficiency requirements Written accessibly to suit a wide range of readers in the shipping industry the book will be especially valuable for ship officers as well as trainees and cadets

Port Strategy for Sustainable Development Elvira Haezendonck, 2021-03-23 Today most large port hubs include the circular economy transformation challenge together with smart digitalization and Internet of Things IoT in their strategic priorities However many ports do not seem to have progressed beyond incremental small scale sustainable innovations or the support of rather fragmented sustainability initiatives The challenges are complex since ports do not only have to reconsider their own core activities but also their role in the supply chain of shippers to lift themselves out of the linear lock in Opportunities are also created and port authorities and businesses need to embrace circular learning and turn these projects into sustainable business models This strategic change or refocus requires new insights into innovative governance and business frameworks the link between strategy and commercially viable business models systems innovation intensified stakeholder collaboration and co creation altered traffic segments and hinterland focus amongst others These Special Issue articles address current CE transition concerns salient to port strategists and managers such as first strategic changes towards circular ports building awareness on the importance of sustainability data and available space and how port authorities can develop circular business models

Congress. Senate. Committee on Commerce, Science, and Transportation,2010 Global Vessel-Source Maritime Pollution Governance—Technical Innovation and Policy Orientation Lang Xu,Zheng Wan,Jihong Chen,2023-09-25 The maritime industry plays an important role in international trade activities and the global economy It is estimated that international shipping carries approximately 80% of global trade by volume and more than 70% by value However increasing maritime activities have had a negative impact on the marine environment and human health For example in November 2002 a tanker

carrying 77000 tons of fuel oil sank in the Bay of Biscay which polluted thousands of kilometers of Western European coasts rivers streams and swamps Oil spills caused by ship accidents and other pollution associated with maritime activities have attracted considerable attention in the research community A large number of studies on shipping pollution have been conducted across different disciplines However new challenges are emerging in maritime operation and management leading to research questions related to intelligent technology and environmental protection maritime pollution and governance maritime accidents and environmental emergency
