

The background of the entire slide is a complex, overlapping collage of architectural drawings. These drawings include cross-sections of walls, floor slabs, window frames, and door thresholds. They show various construction materials like brick, concrete, and insulation, along with structural elements like steel beams and reinforcement. The drawings are rendered in a technical, line-art style with different hatching patterns to represent different materials.

Thus it reports on the latest research findings and innovative approaches, methodologies for creating, assessing and understanding of contemporary built environment. *Los Angeles Residential Architecture* Ruth Wallach, 2015-08-31 During the first half of the twentieth century Los Angeles grew into a sprawling metropolis. As suburbs developed, demonstration homes and housing exhibitions brought innovative architectural and interior design styles. Displays like the California Home and Garden Exhibition showcased the latest in time-saving appliances, modern furniture and cutting edge building techniques meant to represent the future and ideals of Southern California living. Model and tract home exhibitions like those at Leimert Park inspired a new generation of homebuyers. Designed to house the masses, multi-family developments like the Zigzag Moderne style Val d'Amour were benchmarks for their time. Join author Ruth Wallach on a tour of the varied Modernist styles that give Los Angeles its distinct residential landscape.

**Architectural Anthropology** Marie Stender, Claus Bech-Danielsen, Aina Landsverk Hagen, 2021-07-19 This book prompts architects and anthropologists to think and act together. In order to fully grasp the relationship between human beings and their built environments and design more livable and sustainable buildings and cities in the future we need new cross-disciplinary approaches combining anthropology and architecture. This is neither anthropology of architecture nor ethnography for architects but a new approach beyond these positions. *Architectural Anthropology* The anthology gathers contributions from leading researchers from various Nordic universities, architectural schools and architectural firms as well as prominent international scholars like Tim Ingold, Albena Yaneva and Sarah Pink all exploring developing and innovating the cross-disciplinary field between anthropology and architecture. Several contributions are co-written by architects and anthropologists merging approaches from the two disciplines in order to fully explore the dynamics of lived space. Through a broad range of empirical examples, methodological approaches and theoretical reflections the anthology provides inspiration and tools for scholars, students and practitioners working with lived space. The first part focusses on homes, walls and boundaries, the second on urban space and public life and the third on processes of creativity, participation and design.

Shipping Container Homes Everett Sinclair, 2025-02-22 *Shipping Container Homes* explores the innovative trend of transforming shipping containers into sustainable and functional living spaces. The book examines the architectural adaptation of these containers for residential use, highlighting the environmental benefits of repurposing these robust structures. For example, using surplus containers addresses both the global trade imbalance and housing shortages, offering a practical approach to sustainable housing development. The book uniquely combines architectural possibilities with practical

construction techniques The book s approach is comprehensive covering everything from site preparation and container modification to insulation and interior finishing Case studies of successful container home projects worldwide illustrate these points showcasing diverse architectural designs and addressing concerns about structural integrity and insulation challenges By exploring energy efficiency and integration with renewable energy systems the book emphasizes the potential role of container homes in mitigating the environmental impact of traditional construction The content progresses logically beginning with the origins and advantages of container homes then delving into design and construction and finally addressing sustainability and relevant building codes This makes it a valuable resource for architects designers builders homeowners and anyone interested in sustainable living and innovative construction methods
