### **Digital Media in Teaching and its Added Value** David F. Conway, Stefanie Hillen, Melodee Landis, Mary T.

Schlegelmilch, Peter Wolcott, 2015 This book project was initiated in fall 2013 at the University of Nebraska at Omaha UNO Nebraska during a Global Engagement Research and Teaching Workshop between faculty from UNO and the University of Agder UiA Norway The anthology presents articles that center on the application of digital technologies that add value to the teaching and learning process in a globalized context The unique focus of the book is the intersection between pedagogy and technology specifically the innovative use of technology to improve higher education teaching and learning With the increased mobility of faculty and students more diversity among our students and faculty increased cross disciplinary designs alternative environments enabled by technology and greater demand from the millennial generation for increased access and flexibility it is important to share accounts where technology has made a positive impact on the instructional process Topics that are discussed are local studies with implications for the global environment and the innovative use of technology to improve higher education teaching and learning The target audiences for the book are researchers teachers and stakeholders in learning organizations interested in using IT for teaching and learning

### **Opportunistic Challenges** Susan

Rodrigues, 2002 Challenges and opportunities in designing and using appropriate technology in various learning environments are explored here in this overview of information communication technology ICT initiatives in education A key intention of the book is to report on the work of several researchers and product developers engaged in investigating the potential of ICT in learning environments in terms of users computers and organization Chapters discuss implications for design of e learning environments and look at the influence of design on learning Rodrigues is director of the Institute of Science Education in Scotland Annotation copyrighted by Book News Inc Portland OR Practical Use of Ict in Science and Mathematics Teachers' Training at Duce Ayoub Kafyulilo, 2011-10 Master s Thesis from the year 2011 in the subject

Computer Science Didactics University of Twente Behavioural Science course ICT in science and mathematics Educational Science and Technology language English abstract This study investigated the ways through which pre service science and mathematics teachers at Dar es Salaam University College of Education DUCE can acquire competencies for integrating technology pedagogy and content in teaching Specifically the study investigated the preservice teachers ICT integration competencies practices that can be effective in enhancing pre service science and mathematics teachers competency in integrating technology pedagogy and content as well as the impact of those practices in the development of preservice teachers technological pedagogical content knowledge An action research approach was employed in the study employing the pre and post intervention assessment of preservice teachers knowledge on technology pedagogy and content Planned interventions were carried out during the study to enable preservice teachers to identify areas of weaknesses in their technology integration competencies and propose alternative approaches for addressing the identified weaknesses Student

questionnaire instructor interview and observation checklist were used to collect data before during and after intervention. Researcher's log book, digital camera and audio recorder were used in recording events and activities taking place during the study. Findings revealed that when preservice teachers engage in hands-on activities such as microteaching, lesson design and the opportunity to share their ideas with peers, they easily developed their technological pedagogical content knowledge. An analysis of knowledge change after the intervention showed a significant difference between pre-intervention and post-intervention preservice teachers' knowledge of TPACK. It is therefore concluded that the adoption of hands-on activities can be a valuable resource for science teachers and science teacher educators looking for an introductory text that presents an overview of the scientific research analyzing the implementation of digital technologies in science teaching and that provides useful insights to all educators interested in using digital technologies to introduce their students in the world of scientific inquiry and research.

**Using ICT in Inquiry-Based Science Education** Geraldo W. Rocha Fernandes, António M. Rodrigues, Carlos Alberto Rosa Ferreira, 2019-05-21. This book analyzes the main Information and Communication Technologies (ICT) used in science education and the main theoretical approaches that support science education mediated by ICT in order to show how digital technologies can be employed in Inquiry Based Science Education. It presents the results of a comprehensive review of studies focusing both on the use and effects of digital technologies in science education and on the different theoretical approaches that support the use of ICTs in science teaching. By doing so, the book provides a useful summary of the current research in the field and a strong analysis of its limitations. It concludes that there are few studies that report strategies and didactics for the practical use of ICT in science classes and that the use of ICT in science education can't be seen as an isolated action without a theoretical basis to support it. Based on these conclusions, the volume identifies the main ICTs used in inquiry activities, the main steps in inquiry activities used in science education and their approaches to the use of ICT. It shows that the use of ICT in Inquiry Based Science Education allows students to develop more active work styles, improved attitudes towards science, better conceptual and theoretical understanding, improved reasoning, better modelling capabilities and improved teamwork along with improvements in other abilities. Using ICT in Inquiry Based Science Education will be a valuable resource for science teachers and science teacher educators looking for an introductory text that presents an overview of the scientific research analyzing the implementation of digital technologies in science teaching and that provides useful insights to all educators interested in using digital technologies to introduce their students in the world of scientific inquiry and research.
