Figurative Language Dmitrij Dobrovol'skij, Elisabeth Piirainen, 2021-11-08 The book develops a Theory of the Figurative Lexicon Units of the figurative lexicon conventional figurative units CFUs for short differ from all other elements of the language in two points Firstly they are conventionalized That is they are elements of the mental lexicon in contrast to freely created figurative expressions Secondly they consist of two conceptual levels they can be interpreted at the level of their literal reading and at the level of their figurative meaning which both can be activated simultaneously New insights into the Theory of Figurative Lexicon relate on the one hand to the metaphor theory Over time it became increasingly clear that the Conceptual Metaphor Theory in the sense of Lakoff can only partly explain the conventional figurativeness On the other hand it became clear that intertextuality plays a far greater role in the CFUs of Western cultures than previously assumed The book's main target audience will be linguists researchers in phraseology paremiology and metaphor and cultural studies The data and explanations of the idioms will provide a welcome textbook in courses on linguistics culture history phraseology research and phraseodidactics

A Paradigm of Comparative Lexicology Floriana Popescu, 2018-11-07 Intended to bridge the gap between two languages of the Indo European family this

is the first comprehensive bifocal approach to lexicological aspects Through its theoretical distinctions and applications the book recommends itself to language professionals and to any reader interested in learning more about words It starts with a brief theoretical account of overlapping terms which are given crystal clear disambiguations The book then focuses on structural representations of word formations and word relationships outlining their hierarchicalness and branching directions and revealing various levels of materialization entailed by lexical productivity and frequency of occurrence Each of these hierarchies defines its related techniques and explains lexical creations adaptations or adoptions and interrelationships The approach adopted here proves English to be consistent with formative and sense related hierarchies and shows it to have reached a climax in language evolution with its status of a global language making it the standard in comparative linguistics

Digital Idioms. Словарь цифровых идиом Лариса Шитова, 2016-02-24 *The Syntactic Nature of Inner Aspect* Jonathan E. MacDonald, 2008 This book explores the syntactic nature of inner aspect from a minimalist perspective It begins with the new observation that there are two independent properties at play in English inner aspect the object to event mapping and event structure From a discussion of English statives and Russian it is concluded that the former property is variant and the latter universal a minimalist conception of language variation arises naturally in this context Additionally an exploration of a lexical derivational approach to achievements leads to the expectation that there are no accomplishments in the lexicon A detailed look at idioms suggests that this expectation is met These results support the division of labor between an operative lexicon and narrow syntax in aspectual composition this naturally poses a problem for neo constructional approaches to inner aspect Finally one conclusion reached about the syntactic nature of inner aspect regards the object to event mapping it is a purely syntactic phenomenon **Life After Life Imprisonment** Catherine Appleton, 2010-07-08 One of the most contentious and sensitive topics in criminal justice Life after Life Imprisonment looks at the release and resettlement of life sentenced offenders in England and Wales where there are very few prisoners in the system for whom life means life By providing an in depth analysis of the post prison experiences of 138 discretionary life sentenced offenders all of whom released during the mid 1990s this book looks at the reality facing Lifers as they are released at some time during their sentences usually on very long licences to be closely monitored and supervised by probation officers Using accessible and comprehensive data it examines key legal developments within the criminal justice system for discretionary life sentenced offenders explores the frontline experiences of the probation officers charged with supervising life sentenced offenders and analyses the stories or life narratives of a group of individuals who have committed some of the most serious crimes It also examines the process of recall for life sentenced prisoners and explores key factors associated with failure in the community Of interest to legal scholars and criminologists as well as practitioners in the field Catherine Appleton's book offers a major insight into how societies respond to serious crime and identifies important elements of successful reintegration for released life sentenced offenders Whitaker's Books in Print ,1998 Pocket Dictionary of English

Creative Compounding in English Réka

Benczes, 2006-11-08 Metaphorical and metonymical compounds novel and lexicalised ones alike are remarkably abundant in language Yet how can we be sure that when using an expression such as land fishing in order to speak about metal detecting the referent will be immediately understood even if the hearer had not been previously familiar with the compound Accordingly this book sets out to explore whether the semantics of metaphorical and metonymical noun noun combinations can be systematically analysed within a theoretical framework where systematicity pertains to regularities in both the cognitive processes and the products of these processes that is the compounds themselves Backed up by recent psycholinguistic evidence the book convincingly demonstrates that such compounds are not semantically opaque as it has been formerly claimed they can in fact be analysed and accounted for within a cognitive linguistic framework by the combined application of metaphor metonymy blending profile determinacy and schema theory and represent the creative and associative word formation processes that we regularly apply in everyday language *Words that Teem with Meaning [sic]*

Jørgen Erik Nielsen, 1992 Words that Teem With Meaning Copenhagen Views on Lexicography *Primary English Across the Curriculum* Karen Tulloch, Judith Cullen, Enid Jones, Linda Saunders, Gillian Turner, 2012-06-25 This book supports trainee teachers working towards primary QTS in teaching primary English across all areas of the curriculum Focused on teaching a more integrated and inclusive curriculum this text draws out meaningful cross curricular links and explores how the teaching of English can take place across the whole curriculum It examines how a teacher's effective use of English is essential in supporting learning in all subjects and considers the role of the teacher in promoting English Chapters cover topics such as language literature EAL and thinking skills Incorporating the latest thinking in primary English and including exemplars of current good practice this practical guide encourages trainee teachers to explore learning and teaching in new ways About the Transforming QTS Series This series reflects the new creative way schools are beginning to teach taking a fresh approach to supporting trainees as they work towards primary QTS Titles provide full up to date resources focused on teaching a more integrated and inclusive curriculum and texts draw out meaningful and explicit cross curricular links **Linguistic**

Researching and Applying Metaphor in the Real World

Graham Low, Alice Deignan, Lynne Cameron, Zazie Todd, 2010 It has become increasingly clear that metaphor needs to be explored in terms of the social and discourse context in which it is used especially where the aim is to address real world problems The notion of real world metaphor research has been developed to describe this important area of investigation This book starts by describing the nature and scope of real world metaphor research and then illustrates through 17 detailed mainly empirically based studies the different areas it can apply to and different methodologies that can be employed Research problems are explored in areas such as artificial intelligence language teaching and learning reconciliation dialogue university lecture discourse poetry and wine description Methods include corpus analysis experimentation discourse analysis cross cultural

analysis and genre analysis In each case the empirical studies refer back to Gibbs s opening overview of real world research
The result is an invaluable and cross referenced collection of papers addressing real world problems **FLuL** ,1994
