

Solving Problems Involving Probability of Events

1. There are 15 boys and 10 girls in a class. If three students are selected at random, what is the probability that 2 boys and 1 girl are selected?

$$n(E) = {}_{15}C_2 \cdot {}_{10}C_1 = 105 \cdot 10 = 1,050$$

$$n(S) = {}_{25}C_3 = 2,300$$

$$P(E) = \frac{n(E)}{n(S)} = \frac{1,050}{2,300}$$

$$P(E) = \frac{21}{46}$$

Thus, the probability that 2 boys and 1 girl are selected is $\frac{21}{46}$.

Difficult Probability Problems And Solutions:

Fifty Challenging Problems in Probability with Solutions Frederick Mosteller, 2012-04-26 Remarkable puzzlers graded in difficulty illustrate elementary and advanced aspects of probability These problems were selected for originality general interest or because they demonstrate valuable techniques Also includes detailed solutions *Challenging Mathematical Problems with Elementary Solutions* A. M. Yaglom, I. M. Yaglom, 2013-04-26 Volume I of a two part series this book features a broad spectrum of 100 challenging problems related to probability theory and combinatorial analysis Most can be solved with elementary mathematics Complete solutions *Challenging Mathematical Problems with Elementary Solutions ? . ?* ?????, Isaak Moiseevich I?Aglom, Basil Gordon, 1987-01-01 Volume II of a two part series this book features 74 problems from various branches of mathematics Topics include points and lines topology convex polygons theory of primes and other subjects Complete solutions **Statistics: Problems And Solution (Second Edition)** Eryl E Bassett, J Mike Bremner, Byron Jones, Byron J T Morgan, P M North, Ian T Jolliffe, 2000-06-27 Originally published in 1986 this book consists of 100 problems in probability and statistics together with solutions and most importantly extensive notes on the solutions The level of sophistication of the problems is similar to that encountered in many introductory courses in probability and statistics At this level straightforward solutions to the problems are of limited value unless they contain informed discussion of the choice of technique used and possible alternatives The solutions in the book are therefore elaborated with extensive notes which add value to the solutions themselves The notes enable the reader to discover relationships between various statistical techniques and provide the confidence needed to tackle new problems **Problems in Differential Equations** J. Complex Problem Solving Beyond the Psychometric Approach Wolfgang Schoppek, Joachim Funke, Magda Osman, Annette Kluge, 2018-09-28 Complex problem solving CPS and related topics such as dynamic decision making DDM and complex dynamic control CDC represent multifaceted psychological phenomena In abroad sense CPS encompasses learning decision making and acting in complex and dynamic situations Moreover solutions to problems that people face in such situations are often generated in teams or groups This adds another layer of complexity to the situation itself because of the emerging issues that arise from the social dynamics of group interactions This framing of CPS means that it is not a single construct that can be measured by using a particular type of CPS task e g minimal complex system tests which is a view taken by the psychometric community The proposed approach taken here is that because CPS is multifaceted multiple approaches need to be taken to fully capture and understand what it is and how the different cognitive processes associated with it complement each other Thus this Research Topic is aimed at showcasing the latest work in the fields of CPS as well as DDM and CDC that takes a holist approach to investigating and theorizing about these abilities The collection of articles encompasses conceptual approaches as well as experimental and correlational studies involving established or new tools to examine CPS DDM and CDC This work contributes to answering questions about what strategies and what general knowledge can be transferred from one type of complex and dynamic situation to another what learning conditions result in transferable knowledge and skills and how these features can be trained
