Annapoorneshwari Shetty, Dr. Rakesh Kumar B., 2024-08-25 Whiteflies pose a significant threat to agricultural productivity worldwide causing damage to crops and economic losses In this study we present an Android based whiteflies detection system utilizing deep learning techniques specifically leveraging

the YOLOv5 algorithm The objective is to create a robust and efficient solution capable of real time whitefly detection in agricultural fields The proposed system capitalizes on the powerful capabilities of YOLOv5 a state of the art object detection algorithm known for its accuracy and speed Advances in Computer Vision and Information Technology, 2013-12-30 The latest trends in information technology represent a new intellectual paradigm for scientific exploration and the visualization of scientific phenomena This title covers the emerging technologies in the field Academics engineers industrialists scientists and researchers engaged in teaching and research and development of computer science and information technology will find the book useful for their academic and research work *Designing User Interfaces With a Data Science Approach* Banubakode, Abhijit Narayanrao, Bhutkar, Ganesh Dattatray, Kurniawan, Yohannes, Gosavi, Chhaya Santosh, 2022-03-18 Data science has been playing a vital role in almost all major fields Many researchers are interested in the development of IT applications which are user driven with a focus on issues This can be addressed using data science User driven research and data science have gained much attention from many private public and government organizations and research institutions *Designing User Interfaces With a Data Science Approach* promotes the inclusion of more diversified users for user centered designs of applications across domains and analyzes user data with a data science approach for effective and user friendly user interface designs It introduces the foundations of advanced topics of human computer interaction particularly with user centered designs and techniques Covering topics such as artificial neural networks natural dialog systems and machine learning this book is an essential resource for faculty research scholars industry professionals students of higher education mathematicians data scientists interaction designers visual designers software engineers user experience researchers accessibility engineers cognitive system engineers academicians and libraries Applications of Computing and Communication Technologies Ganesh Chandra Deka, Omprakash Kaiwartya, Pooja Vashisth, Priyanka Rathee, 2018-08-29 This book CCIS 899 constitutes the refereed proceedings of the First International Conference on Applications of Computing and Communication Technologies ICACCT 2018 held in Delhi India in March 2018 The 30 full papers were carefully reviewed and selected from 109 submissions The papers are organized in topical sections on communication and system technologies computing and network technologies application and services **Proceedings of the 2015 International Conference on Electrical and Information Technologies for Rail Transportation** Yong Qin, Limin Jia, Jianghua Feng, Min An, Lijun Diao, 2016-03-10 The proceedings collect the latest research trends methods and experimental results in the field of electrical and information technologies for rail transportation The topics cover intelligent computing information processing communication technology automatic control and their applications in rail transportation etc The proceedings can be a valuable reference work for researchers and graduate students working in rail transportation electrical engineering and information technologies Advances in Signal Processing and Intelligent Recognition Systems Sabu M. Thampi, Sanghamitra Bandyopadhyay, Sri Krishnan, Kuan-Ching Li, Sergey Mosin, Maode Ma, 2015-12-24 This Edited Volume

contains a selection of refereed and revised papers originally presented at the second International Symposium on Signal Processing and Intelligent Recognition Systems SIRS 2015 December 16-19 2015 Trivandrum India The program committee received 175 submissions Each paper was peer reviewed by at least three or more independent referees of the program committee and the 59 papers were finally selected The papers offer stimulating insights into biometrics digital watermarking recognition systems image and video processing signal and speech processing pattern recognition machine learning and knowledge based systems The book is directed to the researchers and scientists engaged in various field of signal processing and related areas      *Artificial Intelligence in Healthcare* Lalit Garg, Sebastian Basterrech, Chitresh Banerjee, Tarun K.

Sharma, 2021-10-29 This book highlights the analytics and optimization issues in healthcare systems proposes new approaches and presents applications of innovative approaches in real facilities In the past few decades there has been an exponential rise in the application of swarm intelligence techniques for solving complex and intricate problems arising in healthcare The versatility of these techniques has made them a favorite among scientists and researchers working in diverse areas The primary objective of this book is to bring forward thorough in depth and well focused developments of hybrid variants of swarm intelligence algorithms and their applications in healthcare systems      **ECAI 2023** K. Gal, A. Nowé, G.J. Nalepa, 2023-10-18 Artificial intelligence or AI now affects the day to day life of almost everyone on the planet and continues to be a perennial hot topic in the news This book presents the proceedings of ECAI 2023 the 26th European Conference on Artificial Intelligence and of PAIS 2023 the 12th Conference on Prestigious Applications of Intelligent Systems held from 30 September to 4 October 2023 and on 3 October 2023 respectively in Krak w Poland Since 1974 ECAI has been the premier venue for presenting AI research in Europe and this annual conference has become the place for researchers and practitioners of AI to discuss the latest trends and challenges in all subfields of AI and to demonstrate innovative applications and uses of advanced AI technology ECAI 2023 received 1896 submissions a record number of which 1691 were retained for review ultimately resulting in an acceptance rate of 23% The 390 papers included here cover topics including machine learning natural language processing multi agent systems and vision and knowledge representation and reasoning PAIS 2023 received 17 submissions of which 10 were accepted after a rigorous review process Those 10 papers cover topics ranging from fostering better working environments behavior modeling and citizen science to large language models and neuro symbolic applications and are also included here Presenting a comprehensive overview of current research and developments in AI the book will be of interest to all those working in the field      **Computational Frameworks for the Fast Fourier**

**Transform** Charles Van Loan, 1992-01-01 The most comprehensive treatment of FFTs to date Van Loan captures the interplay between mathematics and the design of effective numerical algorithms a critical connection as more advanced machines become available A stylized Matlab notation which is familiar to those engaged in high performance computing is used The Fast Fourier Transform FFT family of algorithms has revolutionized many areas of scientific computation The FFT

is one of the most widely used algorithms in science and engineering with applications in almost every discipline This volume is essential for professionals interested in linear algebra as well as those working with numerical methods The FFT is also a great vehicle for teaching key aspects of scientific computing

**Proceedings of the International Conference on ISMAC in Computational Vision and Bio-Engineering 2018 (ISMAC-CVB)** Durai Pandian,Xavier Fernando,Zubair Baig,Fuqian Shi,2019-01-01 These are the proceedings of the International Conference on ISMAC CVB held in Palladam India in May 2018 The book focuses on research to design new analysis paradigms and computational solutions for quantification of information provided by object recognition scene understanding of computer vision and different algorithms like convolutional neural networks to allow computers to recognize and detect objects in images with unprecedented accuracy and to even understand the relationships between them The proceedings treat the convergence of ISMAC in Computational Vision and Bioengineering technology and includes ideas and techniques like 3D sensing human visual perception scene understanding human motion detection and analysis visualization and graphical data presentation and a very wide range of sensor modalities in terms of surveillance wearable applications home automation etc ISMAC CVB is a forum for leading academic scientists researchers and research scholars to exchange and share their experiences and research results about all aspects of computational vision and bioengineering

Sentiment Analysis and Deep Learning Subarna Shakya,Ke-Lin Du,Klimis Ntalianis,2023-01-01 This book gathers selected papers presented at International Conference on Sentimental Analysis and Deep Learning ICSADL 2022 jointly organized by Tribhuvan University Nepal and Prince of Songkla University Thailand during 16 17 June 2022 The volume discusses state of the art research works on incorporating artificial intelligence models like deep learning techniques for intelligent sentiment analysis applications Emotions and sentiments are emerging as the most important human factors to understand the prominent user generated semantics and perceptions from the humongous volume of user generated data In this scenario sentiment analysis emerges as a significant breakthrough technology which can automatically analyze the human emotions in the data driven applications Sentiment analysis gains the ability to sense the existing voluminous unstructured data and delivers a real time analysis to efficiently automate the business processes
