The Cunning of Freedom Ryszard Legutko, 2021-01-12 This book has two currents The first is an analysis of the three concepts of freedom that are called respectively negative positive and inner Negative freedom is defined as an absence of coercion positive freedom as an ability to rule oneself and others inner freedom as being oneself that is being the author of one's decisions Each concept is analyzed both in terms of its development in the history of ideas and in terms of its internal logic The major problem of negative freedom is to find widely accepted rules according to which this freedom can be distributed Positive freedom's major difficulty is to define what constitutes a free person The greatest dilemma with inner freedom is how to correlate it with the proper interpretation of the human self The

book advances the thesis and this constitutes the other current of its narrative that we have been witnessing the advent of a new form of despotism much of it being the effect of liberalism's dominant position. Precisely because it took a reductionist position liberalism has impoverished our view of freedom and consequently our notion of human nature with its political moral and metaphysical dimensions

Cross-Border Data Transfers Regulations in the Context of International Trade Law: A PRC Perspective Yihan Dai, 2021-11-02 This book focuses on the PRC's cross border data transfer legislation in recent years as well as the implications for international trade law. The book addresses the convergence of industries and technologies notably caused by digitization, the issue of conflicts between goods and services and the General Agreement on Tariffs and Trade (GATT) and General Agreement on Trade in Services (GATS) as well as the difficulty of classifying service sectors under WTO members' commitments. The book also examines the FTAs that entered into force after 2012 that regulate digital trade beyond the venue of the WTO and analyzes their rules of relevance for cross border data flows and international trade. It asks whether and how these FTAs have deliberately reacted to the increasing importance of data flows as well as to the trouble of governing them in the context of global governance.

Freedom's Progress? Gerard Casey, 2021-10-04 In *Freedom's Progress* Gerard Casey argues that the progress of freedom has largely consisted in an intermittent and imperfect transition from tribalism to individualism from the primacy of the collective to the fragile centrality of the individual person and of freedom. Such a transition, he argues, is neither automatic nor complete nor are relapses to tribalism impossible. The reason for the fragility of freedom is simple: the importance of individual freedom is simply not obvious to everyone. Most people want security in this world, not liberty. Libertarians writes Max Eastman used to tell us that the love of freedom is the strongest of political motives but recent events have taught us the extravagance of this opinion. The herd instinct and the yearning for paternal authority are often as strong. Indeed the tendency of men to gang up under a leader and submit to his will is of all political traits the best attested by history. The charm of the collective exercises a perennial magnetic attraction for the human spirit. In the 20th century Fascism, Bolshevism and National Socialism were, Casey argues, each of them a return to tribalism in one form or another and many aspects of our current Western welfare states continue to embody tribalist impulses. Thinkers you would expect to feature in a history of political thought feature in this book: Plato, Aristotle, Machiavelli, Locke, Mill and Marx but you will also find thinkers treated in *Freedom's Progress* who don't usually show up in standard accounts: Johannes Althusius, Immanuel Kant, William Godwin, Max Stirner, Joseph Proudhon, Mikhail Bakunin, Pyotr Kropotkin, Josiah Warren, Benjamin Tucker and Auberon Herbert. *Freedom's Progress* also contains discussions of the broader social and cultural contexts in which politics takes its place with chapters on slavery, Christianity, the universities, cities, Feudalism, law, kingship, the Reformation, the English

Party-Society Relations in the Republic of Cyprus Giorgos Charalambous, Christophoros Christophorou, 2015-11-19 The Republic of Cyprus social and political culture is deeply partitocratic with a close relationship between state apparatus and the parties that influence the government s decisions However little is known about the social and political implications of the above traits and even less about how parties influence and are influenced by society at large The concept of linkage which refers to the linking of citizens with government and the political process is vital in the study of the electoral or ideological considerations of parties Parties decisions regarding their organization and image correlates with the effort made to keep up with public opinion Party Society Relations in the Republic of Cyprus adds a new dimension to the study of linkage considering the complexity of civil society as well as exploring the dynamics of political parties Bringing together specialists from a range of disciplines it examines the wider effects of partitocracy on democracy and uses it as a frame for exploring the construction maintenance or deformation of links between social groups and parties Through its analysis of both the partisan and societal aspects of party social relations it illuminates larger questions concerning the strategic complexity involved when politics and society interact Approaching the Republic of Cyprus as a representative case study of partitocratic political culture this book is a key resource for those interested in party and civil society politics as well as Cypriot Mediterranean and South East European politics

Teaching Race in Perilous Times Jason E. Cohen, Sharon D. Raynor, Dwayne A. Mack, 2021-03-01 The college classroom is inevitably influenced by and in turn influences the world around it In the United States this means the complex topic of race can come into play in ways that are both explicit and implicit Teaching Race in Perilous Times highlights and confronts the challenges of teaching race in the United States from syllabus development and pedagogical strategies to accreditation and curricular reform Across fifteen original essays contributors draw on their experiences teaching in different institutional contexts and adopt various qualitative methods from their home disciplines to offer practical strategies for discussing race and racism with students while also reflecting on broader issues in higher education Contributors examine how teachers can respond productively to emotionally charged contexts recognize the roles and pressures that faculty assume as activists in the classroom focus a timely lens on the shifting racial politics and

economics of higher education and call for a more historically sensitive reading of the pedagogies involved in teaching race. The Lives of Guns Jonathan Obert, Andrew Poe, Austin Sarat, 2018-09-03 Guns have never been as prevalent in American culture as they are at this moment. Most contemporary conversations on guns either highlight the gun as just a tool used in mass killings or a right to be fiercely defended. Eventually, whatever progress these debates foster in the public conversation tend to halt altogether once the old cliché guns don't kill people, people kill people is trotted out. These gun control and gun violence discussions take the gun as a passive object, ignoring the changing effects and the very agency that guns may deploy as politicized objects. What happens if we reset the conversation and admit that guns and not the people behind them kill people? The Lives of Guns offers a new and compelling way of thinking about the role of the gun in our social and political lives. In gathering ideas from law, science, studies, sociology, and politics, each chapter turns the stale standard gun conversations around by investigating the gun as an object with agency. In approaching guns from a technological perspective down to the very science of how they are created and how they fire, The Lives of Guns takes up a number of questions such as: How does the presence of these objects shape civic ideology? What does it mean to develop and care for gun and gun accessories technology? What do guns mean to those who build them versus those who fight for and against them? What could happen when drone technology meets gun technology? In bringing together fresh perspectives from leading lawyers, political scientists, and historians, The Lives of Guns promises to move the gun debate forward by opening up new ways of thinking about these issues and broadening the scope of these perennial debates. Radar Evaluation Handbook David Knox Barton, Charles Emerson Cook, Paul Charles Hamilton, ANRO Engineering, Inc, 1991 This book describes the steps involved in the evaluation of radar design and performance without complicated math. Turkey and the European Union Firat Cengiz, Lars Hoffmann, 2013-12-04 In recent years, Turkey has become an ever more important actor on the international stage. However, Turkey-EU relations still remain in a state of flux. The EU and Turkey seem to have moved apart in their political aspirations after Turkey's EU accession talks faced a stalemate over the Republic of Cyprus. EU accession as a divided island. Likewise, both Turkey and the EU have recently faced new socio-political realities such as the Eurozone crisis, the Arab Spring, and the Turkish government's shifting foreign policy towards the Middle East region. Such developments have rendered EU membership potentially a less desirable prospect for an increasingly self-confident Turkey. In light of these recent events, this book explores the evolving challenges and opportunities facing the more than 50-year-old Turkey-EU relationship. This volume focuses particularly on the role of the Cyprus issue, the potential for closer Turkey-EU cooperation in the aftermath of the Arab Spring, the impact on Turkish citizens and politics as well as the

concept of Europeanization especially in relation to Turkey's democratic reform process. In drawing together perspectives from the disciplines of international relations, political science, and law, this book offers a unique interdisciplinary outlook towards the changing role of Europe in Turkey's political discourse. This book will be of interest to researchers and students of Turkey, EU relations, EU external relations, Law, Europeanization, and Turkish and Middle Eastern politics. **Field**

Hospital William T. Cavanaugh, 2016. Compelling social perspectives from a prominent Catholic scholar. Pope Francis, in a 2013 interview, famously likened the church to a field hospital. In this book, William Cavanaugh adopts Pope Francis's metaphor to show how the church can help heal both the spiritual and the material wounds of the world. As he examines the intersection of theology with themes of religious freedom, economic injustice, religious violence, and other pressing topics, Cavanaugh emphasizes that the church cannot condemn the evils of the world from a position of superiority. Rather, he says, its practices of solidarity with humanity must be based on a profound recognition that the church shares in the guilt of human sin. Cavanaugh's *Field Hospital* provides guideposts for a church that is willing to go outside of itself onto today's battlefields, both metaphorical and literal, not to inflict wounds but to bind them up and heal them. **Dispatches from the**

South China Sea James Borton, 2022-01-15. The impact of continuous coastal development, reclamation, destruction of corals, overfishing, and increased maritime traffic places all of us on the front lines of preserving our oceans. Marine biologists who share a common language that cuts across political, economic, and social differences recognize that the sea's remarkable coral reefs, which provide food jobs and protection against storms and floods, have suffered unprecedented rates of destruction in recent decades. *Dispatches from the South China Sea*'s blend of participatory research and field reportage paves the way for a transformation of policy and provides a basis for the eventual resolution of some of today's major maritime conflicts. From overfishing, illegal and unregulated fishing, coral reef destruction, and reclamations, *Dispatches from the South China Sea* charts science-driven cooperation opportunities. James Borton purposefully and passionately argues that the South China Sea can become a body of water that unites rather than divides. □□□□2017□ □□□□□□□□□□□□□□

This volume explores the digitization, privatization, and spatial displacement of border security and the effects these have on political accountability and migrant rights. The governance of security and migration is unfolding in new political spaces. Cooperation and competition among immigration officials, border guards, transnational security corporations, IT companies, local police, and international organizations has decoupled migration governance from national political structures. The chapters in the volume examine how these dynamics affect the deployment and constraint of sovereign power in the United States, Canada, the United Kingdom, and the EU. Contributors trace this process from the disciplinary perspectives of law, political science, sociology, criminology, and geography. Part I of the book explores the reconfiguration of security and migration governance through historical processes of privatization, digitization, and the

rescaling of border control technologies to local and global spaces Part II explores how migrant rights actors have responded by rescaling resistance to global and local levels This book will be of much interest to students of critical security studies global governance migration studies and international relations
