The Rise of the Radical Right in the Global South Rosana Pinheiro-Machado, Tatiana Vargas-Maia, 2023-05-31 The Rise of the Radical Right in the Global South is the first academic study adopting an interdisciplinary and international perspective to offer a comprehensive and groundbreaking framework for understanding the emergence and consolidation of different radical right movements in Global South countries in the twenty first century From deforestation and the anti vaccine movement in Bolsonaro s Brazil to the massacre of religious minorities in Modi s India the rise of the radical right in the Global South is in the news every day Not long ago some of these countries were globally celebrated as emerging economies that consolidated vibrant democracies Nonetheless they never overcame structural problems including economic inequality social violence cultural conservatism and political authoritarianism Featuring case studies from Brazil India the Philippines and South Africa and more generally from Africa and Latin America this book analyses future scenarios and current alternatives to this political movement to the radical right It proposes a shift of focus in examining such a trend adopting a view from the Global South conventional theoretical tools developed around the experience in Global North countries are not enough The authors show that the radical right in the

Global South should be analysed through specific lenses considering national historical patterns of political and economic development and instability. They also warn that researching these countries may differ from contexts where democratic institutions are more reliable. This does not mean abandoning a transnational understanding of the radical right; rather, it calls for the opposite: the chapters examine how the radical right is invented, adapted, modified, and resisted in specific regions of the globe. This volume will be of interest to all those researching the radical right and the politics of development and the Global South.

Controlling Small Arms Peter Batchelor, Kai Michael Kenkel, 2013-11-20. This edited volume takes stock of the state of research and policy on the issue of Small Arms and Light Weapons (SALW) ten years after the UN first agreed to deal with the problem. The end of the Cold War originated a series of phenomena that would subsequently come to dominate the political agenda. Perhaps most symptomatic of the ensuing environment is the marked escalation in the scale and dynamics of armed violence driven by the proliferation of SALW. Events in Rwanda, Somalia, and Bosnia seared into global consciousness the devastating effects of this phenomenon and of the necessity to engage actively in its limitation and prevention. This edited volume explores and outlines the research and policy on the SALW issue at this critical juncture. In addition to providing a detailed telling of the genesis and evolution of SALW research and advocacy, the volume features a series of essays from leading scholars in the field on both advances in research and action on SALW. It reflects on what has been achieved in terms of cumulative advances in data methodology and analysis and looks at the ways in which these developments have helped to inform policy making at national, regional, and international levels. Alongside situating and integrating past and present advances in advocacy and international action, *Controlling Small Arms* also outlines future directions for research and action. This book will be of much interest to students of small arms, peace and conflict studies, peacebuilding, security studies, and IR.

Youth In South Africa Ariane De Lannoy, Malose Langa, 2021-05-05. South Africa is characterised by a youthful population, and the challenges and possibilities that characterise the young generation are both warning signs and beacons of hope for a nation founded on social justice. Youth in South Africa Agency in visibility and national development takes stock of the nation's development as it affects young people. Authors offer both personal and professional insights into the ways in which the youth navigate their own pathways to adulthood. These include formal and informal engagements with politics as well as protest, unemployment, entrepreneurship, education, religion, experiences with sexuality and violence, and a multitude of other life experiences. Contributors paint a picture of the initiative, agency, and resilience of the youth as well as the challenges before them. Authors also identify the state of 'waithood' faced by those unable to make the transition out of youth into full adulthood as a result of their socio-economic circumstances and political context. By engaging these experiences and insights and primarily informed by the inputs of young people, the authors highlight the limitations of existing youth policies and frameworks. The case is made for policy instruments to be informed by the lived experiences of the youth as they navigate a complex macrosocial environment and by the messages the youth communicate.

about the limitations of current approaches Constitutional Democracy in Crisis? Mark A. Graber, Sanford Levinson, Mark Tushnet, 2018-08-23 Is the world facing a serious threat to the protection of constitutional democracy There is a genuine debate about the meaning of the various political events that have for many scholars and observers generated a feeling of deep foreboding about our collective futures all over the world Do these events represent simply the normal ebb and flow of political possibilities or do they instead portend a more permanent move away from constitutional democracy that had been thought triumphant after the demise of the Soviet Union in 1989 Constitutional Democracy in Crisis addresses these questions head on Are the forces weakening constitutional democracy around the world general or nation specific Why have some major democracies seemingly not experienced these problems How can we as scholars and citizens think clearly about the ideas of constitutional crisis or constitutional degeneration What are the impacts of forces such as globalization immigration income inequality populism nationalism religious sectarianism Bringing together leading scholars to engage critically with the crises facing constitutional democracies in the 21st century these essays diagnose the causes of the present afflictions in regimes regions and across the globe believing at this stage that diagnosis is of central importance as Abraham Lincoln said in his House Divided speech If we could first know where we are and whither we are tending we could then better judge what to do and how to do it Routledge Handbook of Counterterrorism and Counterinsurgency in Africa
