 Research Board,Division on Earth and Life Studies,Water Science and Technology Board,Committee to Review the Upper  
 Mississippi River-Illinois Waterway Navigation System Feasibility Study,2001-04-30 In 1988 the U S Army Corps of Engineers  
 began an investigation of the benefits and costs of extending several locks on the lower portion of the Upper Mississippi  
 River Illinois Waterway UMR IWW in order to relieve increasing waterway congestion particularly for grain moving to New  
 Orleans for export With passage of the Flood Control Act of 1936 Congress required that the Corps conduct a benefit cost  
 analysis as part of its water resources project planning Congress will fund water resources projects only if a project s  
 benefits exceed its costs As economic analysis generally and benefit cost analysis in particular has become more  
 sophisticated and as environmental and social considerations and analysis have become more important Corps planning  
 studies have grown in size and complexity The difficulty in commensurating market and nonmarket costs and benefits also  
 presents the Corps with a significant challenge The Corps analysis of the UMR IWW has extended over a decade has cost  
 roughly 50 million and has involved consultations with other federal agencies state conservation agencies and local citizens  
 The analysis has included many consultants and has produced dozens of reports In February 2000 the U S Department of  
 Defense DOD requested that the National Academies review the Corps final feasibility report After discussions and  
 negotiations with DOD in April 2000 the National Academies launched this review and appointed an expert committee to

The ways in which we design, make, transport and then discard clothes has a huge social and environmental impact. This book covers responsible business practices and sustainability in the fashion industry from the raw fibre stage through production to the point of customer consumption. The concepts of responsibility and sustainability are fast becoming essential factors in business decisions and Supply Chain Management and Logistics in the Global Fashion Sector leads the reader through the multiple stages in the supply chain that can impact on business strategy. A perfect resource for students studying fashion and for those working in the sector who wish to identify the latest thinking as they plan sustainability strategies, the book is divided into four clear sections. Part I of the book examines sustainability in the supply chain by identifying the three pillars of sustainability: social, economic and environmental, and considers how fashion brands are innovating in this area. Part II looks at fashion logistics and supply chain operations by assessing fibre, yarn and fabric considerations, logistical issues for both garment production and service delivery, stock control, transportation barriers and risks. Part III develops the logistics theme further by identifying recent trends and case studies that highlight agility and lean management structures and the application of transparency-enhancing radio frequency identification (RFID). This section further applies modelling and simulation techniques from the automotive and pharmaceutical industries to the fashion sector. Part IV considers how sustainability can be embedded into the multi-tiered fashion supply chain and its selling environment. Tools for Decision Making David N. Ammons, 2008-10-17. Known for encouraging step-by-step problem solving and for connecting techniques to real-world scenarios, David Ammons' Tools for Decision Making covers a wide range of local government practices from the foundational to the advanced. Brief and readable, each chapter opens with a problem in a hypothetical city and then introduces a tool to address it. Thoroughly updated with new local government examples, the second edition also incorporates chapters devoted to such additional techniques as sampling analysis, sensitivity analysis, financial condition analysis and forecasting via trend analysis. Numerous tables, figures, exhibits, equations and worksheets walk readers through the application of tools and boxed features throughout. Each chapter presents other uses for techniques, helpful online resources and common errors. A handy guide for students and an invaluable resource and reference for practitioners. The Routledge Companion to Accounting Communication Lisa Jack, Jane Davison, Russell Craig, 2013-05-02. One of the prime purposes of accounting is to communicate, and yet to date this fundamental aspect of the discipline has received relatively little attention. The Routledge Companion to Accounting Communication represents the first collection of contributions to focus on the power of communication in accounting. The chapters have a shared aim of addressing the misconception that accounting is a purely technical, number-based discipline by highlighting the use of narrative, visual and technological methods to communicate accounting information. The contents

comprise a mixture of reflective overview stinging critique technological exposition clinical analysis and practical advice on topical areas of interest such as The miscommunication that preceded the global financial crisis The failure of sustainability reporting The development of XBRL How to cut clutter With an international coterie of contributors including a communication theorist a Big Four practitioner and accounting academics this volume provides an eclectic array of expert analysis and reflection The contributors reveal how accounting communications represent or misrepresent the financial affairs of entities thus presenting a state of the art assessment on each of the main facets of this important topic As such this book will be of interest to a wide range of readers including postgraduate students in management and accounting established researchers in the fields of both accounting and communications and accounting practitioners
