**Psychological Healing** Paul C. Larson, 2017-05-17 This book is intended as a text in the history and philosophy of professional psychology It takes a broad view of psychological healing and traces the history of this endeavor from prehistoric times down to the present The story should be useful not only to graduate students in professional psychology but to others in the psycho social or behavioral health fields It emphasizes the importance of multicultural and diversity issues by covering a wide swath of relevant world history to help students understand the cultural matrix that is behind the many people we serve America is a nation of immigrants and they bring with them the legacy of their varied backgrounds A major metaphor is the stream of transmission We practice based on what our teachers knew we improve upon them and in turn pass them on to our students This extended lineage of psychological healing can be summed in four archetypal roles the shaman and priest the physician the teacher and the scientist Modern professional psychology incorporates all of those and this book seeks to tell that story

**Re-envisioning Theoretical Psychology** Thomas Teo, 2019-05-29 This volume presents a re envisioning of the field of theoretical psychology and offers unique visions for its present and future from leaders of North American philosophical psychology It contends that theoretical psychology has reached middle age and must consider new directions to renew its growth Rooted in a range of research traditions and the intellectual biographies of its authors it paves the way

toward this necessary revitalization of the content activities responsibilities and hopes of theoretical psychology The authors situate their analyses in the context of the increasing gap between alternative and mainstream and between the discipline and the profession of psychology They demonstrate that changes in society culture and technology the internationalization of the psychological humanities and the cross fertilization of intellectual innovations from other disciplines now afford possibilities for new orientations in theoretical psychology The volume aims to do justice to psychological topics human beings and the intellectual problems that psychologists encounter while also providing space for meta theoretical engagement often neglected in the discipline Together the chapters in this collection make the case that a renewal of the discipline and practice of psychology is a task that is best accomplished collectively and despite significant disagreements in solidarity

*The Foundations of Psychological Theory* Robert E. Lana, 2019-11-28 Over the previous decade Robert E Lana had attempted to understand the enterprise of psychology as a totality Such an attempt was unpopular in the 1930s 1940s and 1950s but had become increasingly more popular to psychologists in the 1970s After considerable study he became convinced that the twin vehicles for such a task were the history of the field and the epistemological contexts into which psychological theories fit Originally published in 1976 the initial chapters in this volume are devoted to explaining through history the major epistemological ideas either implicit or explicit in modern psychological theory Later chapters are studies of the epistemological contexts that in part yield modern psychological theory

**The Critique of Psychology** Thomas Teo, 2005-09-23 Closely paralleling the history of psychology is the history of its critics their theories and their contributions The Critique of Psychology is the first book to trace this alternate history from a unique perspective that complements the many existing empirical theoretical and social histories of the field Thomas Teo cogently synthesizes major historical and theoretical narratives to describe two centuries of challenges to and the reactions of the mainstream Some of these critiques of content methodology relevance and philosophical worldview have actually influenced and become integrated into the canon others pose moral questions still under debate All are accessibly presented so that readers may judge their value for themselves Kant's critique of rational and empirical psychology at the end of the 18th century The natural scientific critique of philosophical psychology in the 19th century The human scientific critique of natural scientific psychology The Marxist traditions of critique Feminist and postmodern critiques and the contemporary mainstream Postcolonial critiques and the shift from cross cultural to multicultural psychology This is not a book of critique for critique's sake Teo defines the field as a work in progress with goals that are evolving yet constant In emphasizing ethical and political questions faced by psychology as a discipline this visionary book points students academics and practitioners toward new possibilities for their shared future

*Psychology without Foundations* Steve D Brown, Paul Stenner, 2009-08-03 For many years for many people social psychology has been deemed a discipline in crisis This new book proposes a way out of the crisis by letting go of the idea that psychology needs new foundations or a new identity whether biological discursive or cognitive The psychological is not

narrowly confined to any one aspect of human experience it is quite literally everywhere The book proposes a strong process oriented approach to the psychological which studies events or occasions Aspects of experience such as communication or embodiment are treated as thoroughly mediated the product of multiple intersecting relationships between the biological the psychic and the social The outcome is an image of a mobile reflexively founded discipline which follows the psychological wherever it takes us from the depths of embodiment to the complexities of modern global politics *Re-Envisioning Psychology* Frank C. Richardson, Blaine J. Fowers, Charles B. Guignon, 1999-03-26 Does the practice of psychology make a significant and positive contribution to human welfare and the struggle for a good society This book presents a reinvigorating look at psychology and its societal purpose offering a bold new philosophical foundation from which professionals in the field can deeply examine their work Annals of Theoretical Psychology Paul Van Geert, Leendert Mos, 2012-10-21 This is the first of a two volume work in the Annals series devoted to developmental psychology The project was originally conceived in 1985 when Paul van Geert who had just completed his Theory building in developmental psychology North Holland 1986 agreed to collaborate on an Annals volume examining foundational issues pertaining to the concept of development The project attracted considerable interest and in view of the length of the resulting manuscript a decision was made to publish it in two volumes Fortunately the contributors provided coherent perspectives on two relatively distinct developmental themes which served to facilitate our task of dividing their contributions into two volumes The first volume deals with the foundations of developmental theory and methodology the second volume to appear as Volume 8 of the Annals with theoretical issues in developmental psychology In this first volume the contributions by Willis Overton and Joachim Wohlwill were completed in 1988 those by Roger Dixon Richard Lerner and David Hultsch and Paul van Geert in 1989 Commentaries followed quickly and replies to commentaries were completed in 1990 Paul van Geert provides a general framework within which the foundational issues of development are discussed He is especially concerned with the nature of transition models and the structure of time in developmental theory The relationship between methods and framework or theory is the topic of Joachim Wohlwill's contribution
