Forsyth,2015-09-20 The striking appearance of Luftwaffe s Mistel Composite attack aircraft might seem ridiculous to modern eyes but employed correctly these original fire and forget weapons were devastatingly effective as Allied sources testify This book draws on a wealth of first hand reports and revealing contemporary photographs to tell the full strange story of the Mistel units They were the product of a remarkable mix of desperation and innovation and were actually grounded in a pre war non military practise the mounting of one aircraft atop another was initially conceived to extend the ranges of passenger and mail carrying aircraft But as early as 1942 German planners saw the potential for use as a guided missile and by the end of the war the sight of a Ju 88 lashed to a Bf 109 or Fw 190 fighter bearing down on an Allied target was not as rare as one might expect This is a comprehensive account of the Mistel units from their design and development through the first deployments at D Day to the last desperate missions against key bridges on the Oder and the Neisse in the final weeks of the war *Tempest V vs Fw 190D-9* Robert Forsyth,2019-09-19 Arguably two of the finest piston engined fighters ever built the Tempest V and Fw 190D 9 raised the bar in terms of aircraft design and operational capability during World War II The long nosed Dora 9 designed by Kurt Tank first appeared in the skies over the Western and Eastern Fronts in the late summer of 1944 Fast and with an exceptional rate of climb it quickly bettered almost every fighter that the RAF USAAF and Soviet Red Air Force could field The Hawker Tempest V entered service in early 1944 initially proving itself a stalwart performer when it was deployed to intercept V1 flying bombs over southern England From the autumn of 1944 the Tempest V also equipped squadrons of the 2nd Tactical Air Force operating in support of the Allied armies advancing across north west Europe It became a potent ground attack aircraft armed with underwing rockets but also a first class interceptor when pitted against the Luftwaffe s advanced Fw 190D 9 and Me 262 Featuring full colour artwork this book describes in fascinating detail combats between the Tempest Vs of No 274 Sqn and the Fw 190D 9s of I and III JG 26 between February and April 1945

Focke-Wulf Fw 190 Aces of the Western Front John Weal, 2012-10-20 A detailed account of the aces who flew in this model of aircraft The Fw 190 was the scourge of Fighter Command from the moment it appeared on the Western Front at Abbeville in August 1941 with II JG 26 A nimble speedy and well armed adversary the Butcher Bird quickly proved superior to all Allied fighters of the time particularly at medium to low altitude Led by Experten of the calibre of Pips Priller Heinz Bar and Walter Oesau the handful of Fw 190 equipped Jagdgeschwader flew against overwhelming odds firstly on the Channel coast and then in direct defence of the Reich when the Jagdflieger took on the might of the USAAF's Eighth and Ninth Air Forces This is their story

Fighters of the Dying Sun Justo Miranda, 2021-07-11 The first B 29 flew over Tokyo on 1 November 1944 It was a photographic reconnaissance aircraft ironically named Tokyo Rose The Ki 44 fighters of the 47th Sentai took off to intercept it but as it turned out the Superfortress flew at such an altitude and speed that they could not reach it The Ki 44 II Otsu had been specifically designed for this type of interception and could reach the astonishing rate of climb of 5 000 m in four minutes however it was not good enough During the following ten months a devastating bombing campaign of thousands of Superfortresses destroyed 67 Japanese cities and half of Tokyo The cultural shock and the political consequences were huge when it was realised that the Japanese industry was not able to produce the specially heat and stress resistant metallic alloys that were required to manufacture the turbo superchargers needed by the fighters in charge of defending the Japanese mainland They lacked the essential chromium and molybdenum metals to harden the steel This fact thwarted the manufacturing of numerous advanced projects of both conventional fighters and those derived from the transfer of German technology fitted with turbojets and rocket engines They are thoroughly described in this book
