A complete global examination of the complications, diagnoses, and management of HIV infections. Expert and authoritative advice from Joseph R. Masci, Director of Medicine at Elmhurst Hospital Center in New York, who is highly respected in the field. User-friendly sections: core curriculum in HIV medicine, special populations, and systems of care. Up-to-date references ensuring you have access to the most recent information. *Kempe's Engineers Year-book*, 2002 **Gas Turbine Powerhouse** Dietrich Eckardt, 2025-05-06 This book tells the story of the power generation gas turbine from the perspective of one of the leading companies in the field over a period of nearly 100 years, written by an engineer. Especially in times of imminent global economic crises, it appears to be worthwhile to reflect on real economic values and technological leadership based on engineering ingenuity and enduring management. Though the original edition of the book was primarily designed as a technical history of the BBC, ABB, Alstom power generation gas turbines, its scope is sufficiently broad to cover general development trends, including parallel

competitor activities correspondingly the title of this reviewed 3rd edition was adapted in a more general sense A special benefit is the historical breakdown to the gas turbine component level so that the book actually outlines the development of axial compressors from early beginnings based on Prandtl's wing theory the progress in combustion technology towards extraordinary low emission values and that of axial turbines with special emphasis on early turbine cooling innovations already in the 1930s a stroke of genius of the BBC Baden engineering team The sheer length of certain engineering developments over several decades allows interesting historic observations and deductions on inherent business mechanisms the effects of technology preparations and organisational consequences A look into the mirror of the past provides revelations on the impact of far reaching business decisions In 2017 the book received the prestigious Engineer Historian Award of the ASME American Society of Mechanical Engineers
