FLC100 and AGM sensors. The video shows the frequency output of the sensors, which is a key detail in understanding their operation. The output is shown as a series of pulses, with the frequency of the pulses varying over time. This variation is used to measure the magnetic field strength. The video also shows the output of the sensors in a graph, which is a plot of the magnetic field strength over time. The graph shows a clear trend, with the magnetic field strength increasing and then decreasing over the course of the video. This trend is used to demonstrate the accuracy and reliability of the sensors.
